EDD ECONOMIC DEVELOPMENT DEPARTMENT

Prepared by: Daye Kwon & Austin Anaya, Senior Economists

Chart 1. Matched Taxable Gross Receipts Per Quarter

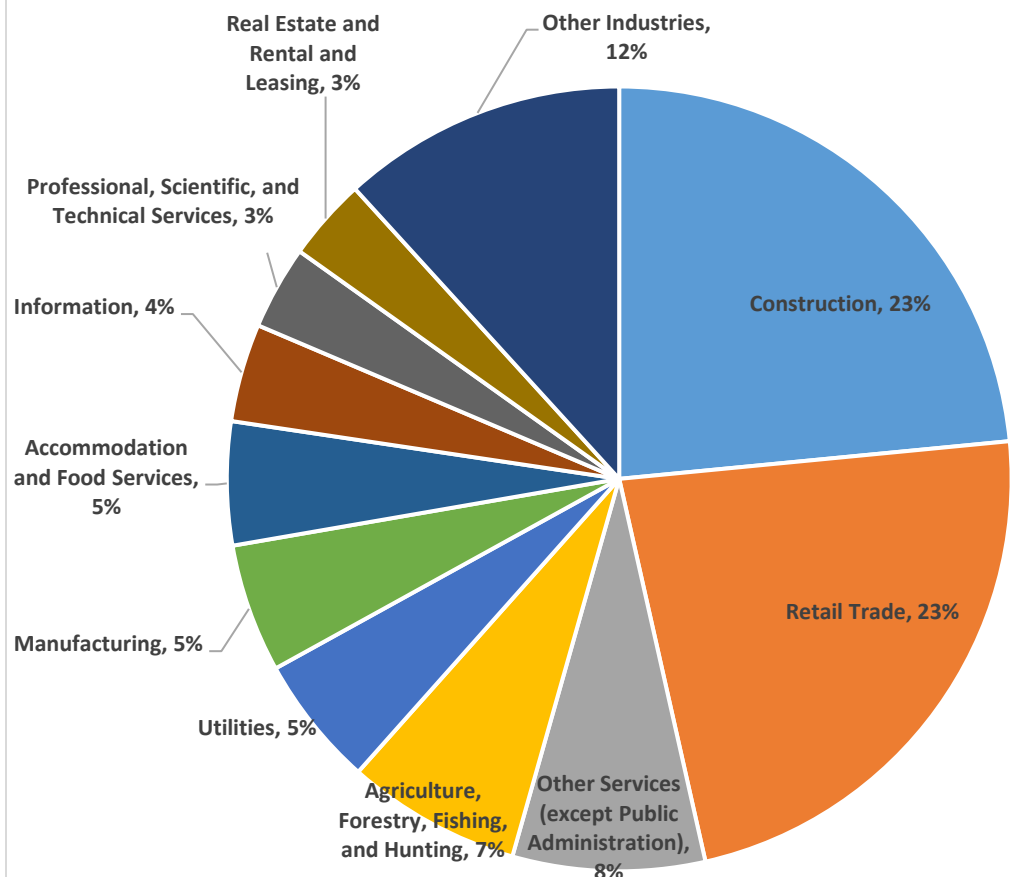

Source: NM TRD - Monthly Local Government Distribution Reports (RP-500)

In the first quarter of FY26, 25 out of 33 counties reported positive year-over-year (YOY) economic growth compared to Q1 FY25, with a statewide 5.8% increase in matched taxable gross receipts (MTGR). Growth was observed across most industry sectors, led by construction. In Q4 FY 25, employment and average wages in New Mexico increased YOY, while the number of establishments declined.

Catron County's MTGR increased by nearly \$5.5M, or 34.7%, from Q4 FY25 to Q1 FY26, as seen in Chart 1. This follows the pattern in which MTGR declines over the course of the fiscal year and then rises sharply in the first quarter. As seen in Chart 2, the largest industries as a percentage of MTGR were the construction and retail trade industries, which each accounted for 23% of the total MTGR during Q1 FY26. Last quarter, retail trade was the largest at 29%.

Matched Taxable Gross Receipts (MTGR) provide the most accurate tax data for assessing underlying economic activity. The data collection process involves matching tax payments with reported receipts for each taxpayer by industry.

Table 1 shows that, based on YOY MTGR changes, Catron County experienced an overall decline. The construction industry recorded the largest decrease, falling by \$7.2M YOY, while the other services industry posted the largest increase, rising by \$466.4K YOY.

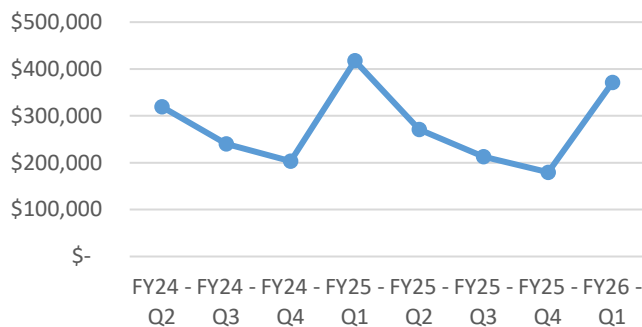

Quarterly gross receipts tax (GRT) collected during Q1 FY26 (\$371.1K) was 106.4% more than the amount collected during Q4 FY25 (\$179.8K), as seen in Chart 4. Table 2 on the next page shows that while employment decreased by 0.3% YOY in Q4 FY25, average wage and the number of establishments increased by 6.8% and 5.3%, respectively.

Quarterly Economic Summary

Catron County

Chart 6. Establishment Year Over Year % Change

An **establishment**, as defined by the Quarterly Census of Employment and Wages (QCEW) and referenced in Chart 6, is an economic unit, such as a farm, factory, or store, located at a single physical address and engaged in one type of economic activity.

Source: NM DWS - Quarterly Census of Employment and Wages and EDD Calculations

The **Quarterly Census of Employment and Wages (QCEW)**, used in Charts 5-6 and Table 2, produces comprehensive data on the number of establishments, monthly employment, and quarterly wages for workers covered by state unemployment insurance (UI) laws and federal workers covered by the Unemployment Compensation for Federal Employees (UCFE) program. These data are aggregated to many different levels, starting at the 6-digit NAICS industry level, to higher industry levels (NAICS industry groups, sectors, and supersectors), and to higher geographic levels (MSA, state, and national).

Data are based on information reported by New Mexico employers, covering 97% of nonfarm wage and salary workers. Data are published every quarter. Considered the gold standard for its reliability of industry data, the QCEW data are the most complete universe of monthly employment and quarterly wage information by detailed industry.

Table 2. FY25 - Q4 Employment Data and Establishments by Industry
